

SOFTWARE **SafetyChain**

Realtime Safety & Quality Management

SafetyChain Software helps the food and beverage industry manage safety and quality compliance in realtime – preventing non-compliant ingredients, raw materials and finished product from coming in or going out.

SafetyChain Software is the industry leader in SaaS-based solutions that provide real ROI in the areas of:

- Supplier Compliance; COA & Spec Management; and Supplier Scorecards & Reporting
- FSQA Data Management
- HACCP/Preventative Controls/GFSI Compliance
- Audit Automation for regulatory, 3rd party and customer audits
- Customer Compliance; Finished Product Testing; and Pre-Shipment Reviews

Food growers, producers, manufacturers, distributors, retailers, food services and importers save time, save money and create efficiencies that contribute to the bottom line.
